SUMMARY

Production Support Analyst with more than five years supporting transportation, freight, and logistics applications across second- and third-line production environments. Hands-on work covers incident response, service requests, SQL data correction, stored procedures, **batch job monitoring**, integration troubleshooting, release validation, and **root-cause analysis**. Career progression from application support into senior production ownership reflects steady growth in technical judgment and business partnership. Critical incidents receive calm triage, clear stakeholder updates, documented workarounds, and coordinated escalation with development and **infrastructure teams**. Data changes follow approval, validation, rollback, security, compliance, and governance controls. Eager to bring this practical production mindset to **Midwest Freight Systems** and help protect shipment continuity, billing accuracy, system health, and customer commitments across North American supply chains.

EXPERIENCE

Senior Production Support Analyst

January 2024 - Present

Great Lakes Distribution Services

Columbus, OH

Owns second- and third-line production support for **transportation management**, **shipment billing**, warehouse, and carrier-integration platforms across 14 facilities. Guides incident decisions, data changes, upgrade validation, and stakeholder communication while protecting operational continuity and compliance.

- Led triage for failed jobs and duplicate shipments, restoring dispatch workflows through documented workarounds.
- Created SQL correction scripts and **stored procedures**, using rollback steps for controlled **data updates**.
- Reviewed logs and job histories, converting recurring incidents into permanent defect fixes or interim controls.
- Coordinated test-environment upgrades, validating **integrations** with business users before production release.
- Updated operations leaders during critical incidents, supporting shipment continuity and customer commitments.
- Partnered with development and **infrastructure teams**, moving complex issues toward durable resolution.

Production Support Analyst

June 2022 - December 2023

RoutePoint Logistics

Indianapolis, IN

Supported **freight brokerage**, intermodal, and transportation applications through an **IT service management** queue. Investigated escalated incidents, monitored integrations and batch processing, corrected approved data issues, and connected operations with development and infrastructure partners.

- Resolved escalated brokerage incidents through ServiceNow, restoring settlement workflows within agreed priorities.
- Monitored **batch processing** and integrations, finding stalled workflows before dispatch interruptions occurred.
- Applied approved SQL updates after reconciling order, shipment, carrier, and **invoice records**.
- Built troubleshooting guides for **first-level support**, reducing avoidable escalations during recurring failures.
- Collected logs and test evidence for developers, improving defect reproduction and deployment verification.
- Maintained outage timelines and practical workarounds, giving **operations teams** steady incident guidance.

Application Support Specialist

January 2021 - May 2022

Harborline Freight Technologies

Cincinnati, OH

Provided application support for warehouse, dispatch, and freight invoicing users across **logistics** workflows. Combined SQL investigation, log review, job tracking, test validation, documentation, and peer coaching to keep business transactions moving.

- Resolved access and workflow issues, helping **warehouse** and **dispatch** users resume daily transactions.
- Used SQL queries and logs, isolating incomplete records and failed background processes.
- Tracked scheduled jobs and file exchanges, escalating reproducible issues with diagnostic evidence.
- Compared source records before approved corrections, preserving auditability for operations requests.
- Executed regression scenarios in test environments, reporting patch defects before release.
- Coached service desk colleagues on recurring interface and transaction errors, building first-line confidence.

PROJECTS

Freight Integration Continuity Initiative 📅 2025

Mapped inbound and outbound freight integrations, batch dependencies, and recovery steps across dispatch and billing workflows. Created monitoring checks, escalation paths, and validation notes that gave operations a clearer response during interface delays.

Controlled Data Correction Framework 📅 2024

Established a repeatable approach for SQL corrections involving approvals, source comparison, validation queries, rollback planning, and audit records. Framework supported safer updates for shipment, carrier, and invoice data.

Production Upgrade Validation Program 📅 2023

Coordinated test scenarios for logistics application upgrades, including regression coverage, integration checks, business signoff, and deployment evidence. Program helped surface workflow defects before release into production.

LEADERSHIP & AWARDS

- Senior Analyst Recognition, Great Lakes Distribution Services, 2025
- Service Reliability Contribution Award, RoutePoint Logistics, 2023
- Peer Leadership Recognition for First-Level Support Coaching, 2022

EDUCATION

Bachelor of Science in Information Technology

University of Cincinnati GPA: 3.6

2020

Cincinnati, OH

Coursework: Database Systems, Systems Analysis, Network Administration, Information Security

CERTIFICATIONS

- ITIL 4 Foundation 📅 2023
- Microsoft Certified: Azure Fundamentals 📅 2022

TECHNICAL SKILLS

- **Database Technologies:** Microsoft SQL Server, SQL queries, stored procedures
- **Service Management:** ServiceNow, ITIL 4, Jira
- **Documentation Platforms:** Confluence, Jira, Microsoft SharePoint
- **Cloud Platforms:** Microsoft Azure, Azure Fundamentals, Azure Monitor
- **Integration Methods:** APIs, file exchanges, electronic integrations
- **Production Monitoring:** Batch jobs, application health, job histories
- **Diagnostic Analysis:** Application logs, database checks, incident timelines
- **Testing Practices:** Regression testing, test cases, integration validation
- **Release Management:** Application upgrades, deployment verification, release validation
- **Data Controls:** Approval records, validation queries, rollback steps
- **Logistics Systems:** Transportation management systems, freight brokerage, intermodal operations
- **Operational Workflows:** Dispatch operations, shipment billing, warehouse workflows
