## SUMMARY

Experienced Program Manager skilled in privacy and data governance with over three years of practical knowledge in AI program delivery. Proven track record of leading initiatives that establish robust governance frameworks while ensuring compliance. Able to work seamlessly across teams, transforming complex legal requirements into actionable plans that facilitate rapid development and operational efficiency. Passionate about harnessing AI technologies responsibly, guiding cross-functional collaboration to drive business value while upholding the highest standards of privacy and security.

## EXPERIENCE

**Program Manager** January 2024 - Present  
Tech Innovations Inc. Chicago, IL

Serves as a key leader for AI initiatives, implementing privacy and data protection programs within technology projects. Oversees execution of comprehensive strategies that enhance compliance and improve processes across multiple teams.

- Led execution of privacy protocols, enhancing compliance across AI projects.
- Crafted standard operating procedures for AI governance, amplifying process efficiency.
- Collaborated closely with product and engineering teams, embedding privacy within development lifecycles.
- Conducted thorough assessments on AI risk, proactively identifying vulnerabilities.
- Utilized OneTrust to streamline governance and compliance workflows effectively.
- Generated metrics reports that tracked compliance progress and supported executive decision-making.

**Compliance Analyst** June 2021 - December 2023  
Data Solutions Corp. Los Angeles, CA

Focused on facilitating the establishment of effective privacy policies and governance frameworks in alignment with regulatory requirements. Provided analyses and support to various teams during the implementation of AI programs.

- Assisted in privacy policy rollout and data governance frameworks for major projects.
- Coordinated communications between departments, streamlining project timelines.
- Converted regulatory requirements into clear operational guidelines for tech teams.
- Offered training sessions on compliance best practices and governance tools.
- Reviewed current data protection measures, advocating for necessary enhancements.
- Documented compliance efforts comprehensively, preparing for potential audits.
