SUMMARY

Compassionate and dedicated Pulmonology Nurse Practitioner with over two years' experience in long-term care and skilled nursing environments. Proven expertise includes diagnosing and managing respiratory conditions such as asthma, COPD, and pneumonia. Skilled in developing individualized treatment plans that incorporate thorough assessments and patient education materials. Excellent organizational and time management skills drive continuous improvement for patient outcomes. Eager to contribute to a collaborative team focused on high-quality care while ensuring compliance with protocols and regulations.

EXPERIENCE

Pulmonology Nurse Practitioner

CareWell Health Services 📅 January 2025 - Present 📍 Rochester, NY

Oversee pulmonary health services, championing best practices to deliver exceptional patient care. Collaborate effectively with medical teams in managing comprehensive patient assessments, diagnostic procedures, and managing treatments where needed.

- Conducted comprehensive assessments and screenings for patients with asthma, COPD, and pneumonia, ensuring accurate diagnosis and effective treatment plans.
- Performed spirometry and chest X-rays, facilitating data-driven decision-making on patient progress.
- Developed patient education materials focusing on medication adherence, significantly enhancing patient engagement and adherence.
- Collaborated with interdisciplinary teams to optimize the treatment protocol tailored to individual patient needs.
- Monitored and documented patient responses to treatments in EMR systems, supporting regulatory compliance and quality patient care.
- Initiated follow-up processes leading to timely adjustments in care based on evolving patient requirements.

Nurse Practitioner

Greenwood Nursing Facility 📅 June 2024 - December 2024 📍 Syracuse, NY

Provided primary care services in a skilled nursing setting focused on optimization of respiratory health and management of complex conditions.

- Provided direct patient care with a focus on respiratory illnesses, implementing therapeutic interventions coordinated with specialized staff.
- Pioneered educational initiatives for patients and families on disease management strategies, uplifting health outcomes.
- Streamlined communication between nursing and specialist teams to create a more integrated approach to patient care.
- Executed routine evaluations which enhanced continuity of care and allowed for preemptive adjustments in therapy.
- Coordinated care planning meetings that promoted shared insights on patient responses to interventions, improving overall team dynamics.
- Implemented best practices for respiratory care, significantly reducing patient acuity levels and improving wellness indicators.
