SUMMARY

Motivated Quantitative Analyst committed to blending analytical skills with innovative trading strategies. Three years of experience in algorithmic development and data analysis fuel a confident approach towards solving complex financial problems. Collaboration drives success; empowering peers enhances performance across the board. Emphasizing adaptable problem-solving approaches leads to meaningful impacts within trading operations. Passionate about leveraging low-level programming skills, particularly in C++, to create efficient algorithms, while continuously striving for personal and professional growth.

EXPERIENCE

Quantitative Analyst

June 2024 - Present

Tech Innovations Group

Chicago, IL

Responsible for developing advanced trading algorithms aimed at enhancing market efficiency on a daily basis. Key contributor to projects analyzing market conditions, facilitating deeper insights into trading strategies. Building collaborative relationships with team members fosters creative problem-solving techniques. Consistently engages in backtesting new models to assure effective trading methodologies are implemented.

- Engineered and deployed C++ trading algorithms, achieving notable efficiency improvements in daily operations.
- Partnered with diverse teams to analyze and interpret complex market data effectively.
- Executed rigorous backtesting phases for each algorithm, refining strategies based on empirical feedback.

Junior Quantitative Developer

July 2022 - May 2024

Future Financial Solutions

Chicago, IL

Assisted in creating software tools that enhance trade execution processes. Emphasis placed on collaborating with cross-functional teams allowed impactful solutions to emerge. Increased awareness of quantitative methods through active involvement in development cycles.

- Designed user-friendly applications supporting document workflows across trading sectors.
- Performed detailed analyses producing actionable recommendations based on found data.
- Contributed regularly in team meetings focused on innovating the functioning of trading processes.

Internship Project

September 2021 - June 2022

University Projects

Springfield, IL

Engaged in extensive research project aimed at simulating effective trading strategies. This experience helped gain a firm understanding of both theoretical concepts and their practical application. Collaborated closely with classmates to innovate beyond traditional boundaries.

- Developed simulation models utilizing C++, demonstrating adeptness with low-level programming.
- Implemented various data structures adeptly managing multiple datasets throughout the simulated environment.
- Analyzed project reflections collectively to refine and adapt the outcome toward proficient self-improvements.

LEADERSHIP & AWARDS

- Top Emerging Leader Award for Budget Management (2023)
- Departmental Recognition for Innovative Work in Trading Strategy Analysis (2025)
