SUMMARY

Dedicated Registered Nurse boasting over a year of hands-on experience in acute care and stem cell transplantation. Proven ability to take ownership of patient assessment, planning, implementation, and evaluation, especially within high-stakes environments. Committed to continuous professional growth, recognized for obtaining critical certifications like BLS and ACLS. A strong collaborator who successfully directs multidisciplinary teams to foster exceptional patient outcomes during complex and demanding cases. With a passion for oncology nursing and dedication to healthcare excellence, ready to contribute positively to team efforts at Hope Medical Center.

EXPERIENCE

Registered Nurse, Stem Cell/ICU

Hope Medical Center 📅 January 2025 - Present 📍 Zion, IL

As a Registered Nurse in the ICU, oversee care for hematology/oncology patients, leverage complex medical knowledge to address unique patient needs. Manage mentoring of patient care technicians while enforcing safety and compliance standards across practices.

- Conduct comprehensive assessments, discerning patient challenges and engaging care strategies ensuring safety and effectiveness.
- Assist in specialized procedures and enable advanced treatment plans, significantly contributing to positive patient outcomes.
- Direct and collaborate with support staff, establishing clear care directives while fostering a team-centric approach.
- Systematically manage IV therapies, ensuring precision in medication administration amidst fluctuating patient conditions.
- Employ sophisticated monitoring technologies to track vital signs, responding promptly to emergencies such as Code Blue situations.
- Participate in continual education initiatives, achieving ONS certification ahead of deadlines and reflecting commitment to profession.

Nursing Intern

St. Mary's Hospital 📅 June 2024 - December 2024 📍 Zion, IL

Gained foundational experience by supporting nursing activities in an intensive care unit setting, focusing on patient assessments and direct care. Developed knowledge of clinical protocols along with active participation in team collaborations.

- Assisted nursing staff with daily tasks, demonstrating effective teamwork under supervision while enhancing overall care delivery.
- Conducted patient assessments alongside tenured nurses, updating documentation timely to ensure holistic understanding of patient health.
- Engaged in direct patient interactions, building communication bridges that fostered rapport among patients and their families regarding care updates.
- Participated in departmental meetings, proposing ideas that lead to improved patient management and team operations.
- Capitalized on hands-on experiences monitoring vital signs, enabling genuine learning about critical care procedures.
- Successfully completed BLS training concurrently maintaining certification throughout the tenure.
