SUMMARY

Compassionate Registered Nurse specializing in critical care, bringing over a year of experience in dynamic clinical settings. Proven history of assessing patient needs, executing effective care plans, and collaborating with multidisciplinary teams to enhance patient outcomes. Advocates for patient safety and ethical practices while actively pursuing continuous professional development. Committed to maintaining high standards of care within evidence-based frameworks. Engagement in quality initiatives demonstrates dedication to improving patient care processes and fostering teamwork in the delivery of compassionate healthcare.

EXPERIENCE

Critical Care RN

HealthFirst Medical Center 📅 June 2025 - Present 📍 Chicago, IL

Responsibilities include delivering high-quality nursing care by interacting closely with critically ill patients and their families within a fast-paced environment. Lead implementation of unit-based quality improvement initiatives centered on evidence-based practices supporting enhanced patient experiences and better health outcomes.

- Engaged in unit councils to enhance care quality through active participation in governance initiatives.
- Utilized nursing processes including assessment, planning, diagnosis, implementation, and evaluations tailored to individual patient needs.
- Monitored evolving patient conditions, making collaborative adjustments to care plans resulting in improved recovery paths.
- Diligently promoted a culture of safety, continually evaluating clinical outcomes and amending protocols as needed.
- Expertly administered medications according to established clinical protocols ensuring patient comfort and adherence to safety standards.
- Maintained accurate, confidential, and timely documentation within electronic health records complying with all regulatory requirements.

Nursing Intern

University Research Lab 📅 September 2024 - May 2025 📍 Chicago, IL

Supported innovative clinical research projects focused on quality improvement in critical care. The role involved comprehensive data collection and analysis contributing to departmental education goals.

- Assisted in research targeting patient care interventions merging insights from academic theory and clinical practice.
- Collaborated actively with nursing staff to gather and interpret data enhancing quality improvement efforts.
- Participated in patient assessments and care planning, observing best practices in evidence-based nursing.
- Engaged in simulations designed to refine skills in emergency response, further solidifying real-world application.
- Developed resource materials promoting awareness for patients and families concerning treatment pathways.
- Presented research findings at gatherings facilitating knowledge sharing within the department and eliciting strategic discussion.
