STRENGTHS

- 🔍 **Quiet problem solving**
When production data looked ordinary, closer review revealed useful signals. Turned those signals into focused improvement work.
- 👥 **Leader development**
Coaching managers and improvement teams made new methods feel workable. People gained confidence through steady practice.
- 🎯 **Operational clarity**
Performance standards, audits, and governance routines gave plant leaders a calmer view of priorities and progress.
- ⚙️ **Frontline adoption**
Digital work processes succeeded through patient support on production floors. Teams had room to ask practical questions.
- 🛠️ **Cross functional trust**
Maintenance, operations, and leadership found common ground during reliability work. Small agreements kept larger efforts moving.

Value Stream Analysis

SUMMARY

Operations excellence leader with 10 years of manufacturing experience improving safety, quality, service, cost, engagement, and **operating performance** through Lean Manufacturing, Six Sigma, TPM, and **structured problem solving**. Leads integrated improvement programs, governance routines, performance standards, audits, and improvement roadmaps with plant leadership. Uses SAP S/4, Power BI, and advanced Excel analysis to identify trends, guide decisions, and clarify operational priorities. Builds capability through coaching, leader development, **digital work processes**, **connected manufacturing tools**, and practical change management. Career progression from Process Improvement Engineer through Continuous Improvement Manager to Senior Operations Excellence Manager reflects growing ownership across manufacturing systems and cross functional teams. Brings a thoughtful, hands on approach that makes quiet process gains visible and helps manufacturing teams sustain better results.

EXPERIENCE

Senior Operations Excellence Manager

Midwest Consumer Manufacturing 📅 February 2021 - Present 📍 Springfield, IL

Leads enterprise manufacturing improvement across plant operations, guiding Lean Manufacturing, TPM, Six Sigma, governance, digital work processes, analytics, and **frontline capability development**. Partners with plant leaders and senior stakeholders to connect improvement priorities with safety, quality, service, cost, and operating performance.

- Directed **Lean Manufacturing**, TPM, and Six Sigma programs across **manufacturing operations**, strengthening improvement discipline.
- Established governance routines, audits, **performance standards**, and roadmaps with **plant leadership** for consistent execution.
- Coached managers and improvement teams through structured problem solving, helping practical changes hold on production floors.
- Used **SAP S/4**, Power BI, and Excel analysis to surface trends and guide operating decisions.
- Deployed digital work processes and connected manufacturing tools, supporting frontline adoption through clear coaching.
- Presented performance insights, risks, and progress to senior stakeholders, keeping improvement priorities visible.

Continuous Improvement Manager

Prairie Industrial Foods 📅 May 2018 - January 2021 📍 Peoria, IL

Managed plant improvement programs focused on safety, quality, productivity, operating consistency, capability development, change management, value stream analysis, and equipment reliability. Connected production, maintenance, and leadership teams around practical improvements and clearer business outcomes.

- Managed **safety**, **quality**, productivity, and consistency initiatives across production areas, improving daily operating focus.
- Built Lean capability plans and training sessions that gave teams practical methods for process reviews.
- Facilitated **value stream analysis** workshops, helping production groups see delays and select focused improvements.
- Supported operational transformation through **change management** activities, keeping adoption grounded in frontline realities.
- Partnered with maintenance and operations **teams** to address **reliability** challenges through focused problem solving.
- Tracked improvement initiatives and communicated business outcomes, giving leaders a clearer view of progress.

Process Improvement Engineer

Central Manufacturing Solutions 📅 July 2016 - April 2018 📍 Bloomington, IL

PROFESSIONAL AFFILIATIONS

- Association for Manufacturing Excellence participant, sharing practical improvement ideas with operations peers.
- Institute of Industrial and Systems Engineers member, connecting engineering analysis with manufacturing performance.
