SUMMARY

Focused master data management professional with over six years of experience dedicated to enhancing data quality and process improvement. Skilled in managing data within ERP environments such as SAP and BlueYonder, collaborating effectively with cross-functional teams to ensure high data accuracy. Adept at analyzing discrepancies and driving corrective actions, committed to leveraging expertise in Power BI and Excel for insightful reporting. Proven success in maintaining supplier, customer, and BOM data integrity while supporting inventory management efforts. Eager to contribute to a team that values collaboration and continuous improvement.

EXPERIENCE

Senior Master Data Analyst

January 2021 - Present

Data Solutions Group

Chicago, IL

Lead responsibilities in master data creation and maintenance across various ERP systems. Focused on ensuring reliability of supplier, customer, and BOM data through meticulous management processes.

- Managed high levels of SKU data accuracy by streamlining setup and lifecycle alignment.
- Conducted audits and regular data cleansing activities, preserving quality standards and compliance.
- Collaborated with procurement teams on vendor data validation, speeding up onboarding.
- Developed detailed reports and dashboards using Power BI to track master data trends.

Master Data Analyst

June 2018 - December 2020

Tech Innovations LLC

Chicago, IL

Oversaw customer and supplier data maintenance, ensuring consistent operational workflows aligned with business operations. Drove process improvements related to data governance standards.

- Implemented effective data validation measures, resolving discrepancies swiftly.
- Supported product development by establishing timely setups for new SKUs.
- Facilitated improved procurement processes through transparent data handling.
- Engaged with teams to enhance data accuracy, contributing significantly to operational goals.

Data Analyst Intern

September 2016 - May 2017

University Project

Remote

Played an instrumental role in data analysis projects, focusing on supply chain efficiency and academic research endeavors to solidify theoretical knowledge through hands-on experience.

- Analyzed datasets to produce actionable insights aiding academic publications.
- Worked collaboratively with peers to present findings in clear, compelling formats.
- Assisted in the design of data collection methodologies improving study outcomes.
- Developed slides and reports summarizing impactful data analysis for presentations.
