Hiring Manager
WSP
Tacoma, WA

Dear Hiring Manager,

I am elated to submit my application for the Senior Professional, Civil Engineer position at WSP. This role aligns impeccably with my skills, which have developed through a considerable journey in civil engineering. My experiences seem tailor-made for WSP's innovative projects.

Joining your team excites me greatly. Working on dynamic transportation projects has always fueled my passion for engineering. I understand that your organization prioritizes client connections, and I am eager to collaborate with your expert team to achieve success.

While at Innovative Engineering Solutions, I led a team of engineers on a complex transportation initiative that flourished. Our ability to meet client specifications while ensuring safety resulted in commendations from public agencies. However, challenges arose, and sometimes I doubted if I could guide my team effectively.

I recognize how crucial effective communication is in our field. I have consistently engaged with clients and public agencies. Ensuring their visions come to life motivates me deeply. My proficiency with Civil 3D and project management has equipped me to tackle these challenges head-on.

I yearn to contribute to WSP's mission and innovate as we drive quality solutions. My skills fit seamlessly with your standards. I would love to further discuss my qualifications and potential contributions. Together, we can envision a future of impactful engineering and project success.

Thank you for considering my application.

Sincerely,

Linh Wiggins
