Hiring Manager
Tech Solutions Inc.
Los Angeles, CA

Dear Hiring Manager,

I am excited to apply for the Service Technician Intern position at Tech Solutions Inc. This role resonates well with my studies and mechanical proficiency. Pursuing Mechanical Engineering has refined my passion and skills, making me eager to face challenges.

While I recently engaged in a boot camp focused on servicing diesel engines, I found collaboration pivotal. Working closely with peers, we tackled mechanical issues head-on, learning through practical application and teamwork. This experience sparked joy, revealing a fundamental truth about how great teamwork translates into tangible results.

During my university project, we developed mechanical prototypes using CAD software, which honed my ability to analyze systems. I still recall the late nights spent redesigning components, striving for efficiency. Every small success felt exhilarating as we presented our findings, having pushed through the trials.

I acknowledge that learning comes with obstacles. However, my determination shines through as a testament to my growth. I seek to improve technical aspects daily, adapting swiftly whether assisting mechanics or learning from colleagues at Tech Solutions.

Joining Tech Solutions excites me due to its commitment to employee development. I am inspired by the inclusive culture and the support offered. This environment would certainly foster my career in automotive technology, aligning perfectly with my aspirations.

Thank you for considering my application.

Sincerely,

Jack Baker
