Hiring Manager
ABC Inc.
12 ABC Inc. Drive
Pleasant Prairie, IL 60053
Dear Hiring Manager,

I am thrilled to apply for the Software Developer intern position at ABC Inc. This opportunity aligns perfectly with my academic journey and burgeoning interest in software development. Through my coursework and projects, I have become increasingly passionate about programming and problem-solving.

ABC's commitment to quality and innovative projects deeply resonates with my ambitions. Working with an Agile Scrum team to build full-stack applications excites me. The chance to utilize technologies like Java and .NET aligns seamlessly with the skills I cultivated during past internship experiences. Moreover, my background with databases like PostgreSQL mirrors your requirements.

Throughout my studies, I've led team projects. One memorable project involved developing a web application that streamlined communication for a student group. This experience taught me collaboration's value and sharpened my technical abilities. Participating in troubleshooting and maintaining code using unit testing similarly prepared me for this internship.

I deeply admire ABC's positive work culture. The idea of 'Lunch and Learn' sessions where interns can broaden their industry knowledge truly excites me. I have always believed that learning should extend beyond traditional settings. Experiences like network events will cultivate valuable connections, ensuring fresh insights.

In closing, I am eager to contribute to ABC's impactful projects while growing alongside your dedicated team. I believe this role will empower me to meld my technical skills and passion for innovative solutions. I am looking forward to the possibility of discussing my application further.

Best regards

Daniel Allen,

Daniel Allen
