SUMMARY

Dedicated Software Engineer with over 4 years of experience orchestrating full-stack application development. Played pivotal role in designing and implementing scalable applications using Java technologies and engaging effectively with cross-functional teams. Developed high-impact software solutions while championing best practices in code quality through Test-Driven Development. Proven ability to tackle complex technical challenges, mentor junior engineers, and enhance overall team performance through collaboration. Eager to contribute to innovative projects at Tech Solutions Inc., driving business objectives while fostering a culture of continuous improvement.

EXPERIENCE

Software Engineer

June 2022 - Present

Tech Innovations LLC

Charlotte, NC

In this role, spearhead the design and implementation of sophisticated software solutions leveraging Java and Spring Boot. Introduced robust systems architecture to enhance application performance while mentoring junior staff on best coding practices.

- Designed and implemented complex software solutions using Java and Spring Boot, enhancing functionality and performance across applications.
- Led code reviews and mentored junior engineers, cultivating a collaborative environment of continuous improvement and knowledge sharing.
- Collaborated with diverse teams to troubleshoot and resolve technical issues, which improved system reliability and reduced downtime.
- Conducted systems analysis to identify operational improvements, recommending enhancements that streamlined processes.
- Developed and managed CI/CD pipelines using GitLab CI, ensuring smooth deployment processes for various applications.
- Maintained thorough documentation of system specifications and design standards, providing clarity for future development efforts.

Junior Software Engineer

March 2020 - May 2022

Digital Solutions Corp.

Charlotte, NC

Contributed to enterprise-level application development by focusing on data integration and batch processing within a collaborative team environment. Engaged with QA to elevate testing protocols and instill better code quality.

- Assisted in developing enterprise-level Java applications, emphasizing batch processing and seamless data integration for efficiency.
- Participated in design reviews, contributing insights to enhance the scalability and security of proposed solutions.
- Analyzed production issues, resolving application performance concerns to minimize disruption during service operation.
- Partnered with QA teams to execute automated testing frameworks, achieving higher levels of overall code reliability.
- Embraced continuous learning of emerging technologies, notably cloud platforms that enhanced project execution.
- Integrated third-party services such as DocuSign into existing applications, improving the user experience significantly.

Software Development Intern

January 2019 - February 2020

Code Solutions Inc.

Charlotte, NC

Gained practical experience in web application development while working under the guidance of senior engineers. Engaged actively in testing software functionalities through rigorous methodologies.

- Contributed to developing web applications utilizing JavaScript, HTML, and CSS, successfully improving user engagement metrics.
- Assisted in troubleshooting application issues, taking proactive actions under senior mentorship for effective resolution.
- Participated in agile ceremonies including sprint planning and retrospectives, advancing team collaboration and productivity.
- Developed unit tests to ensure code reliability, fortifying adherence to essential quality standards.
- Worked closely with design teams to implement user-friendly interfaces, garnering positive feedback from users.
- Engaged in learning sessions about cloud technologies and contemporary development best practices for broader insights.

LEADERSHIP & AWARDS

- Dean's List, University of North Carolina, 2024
- Winner, National Coding Hackathon, 2025

EDUCATION

Bachelor's Degree in Computer Science

2026

University of North Carolina GPA: 3.5

Chapel Hill, NC

Coursework: *Data Structures, Software Engineering, Database Management, Web Development*

CERTIFICATIONS

- Certified Java Developer 2026
- AWS Certified Developer – Associate 2026

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, SQL
- **Development Frameworks:** Spring Boot, Gradle, Maven
- **Version Control tools:** Git
- **Continuous Integration Tools:** Jenkins, GitLab CI
- **Testing Tools:** JUnit, Mockito, Selenium
- **Cloud Platforms:** AWS, Azure, Google Cloud
- **Database Technologies:** MySQL, PostgreSQL, MongoDB
- **Agile Methodologies:** Scrum, Kanban, Lean
- **Containerization Tools:** Docker, Kubernetes, OpenShift
- **APIs:** REST, SOAP

SKILLS

- Java
- Spring Boot
- JavaScript
- SQL
- Git
- CI/CD
- Agile Methodologies
- Cloud Technologies
- Test-Driven Development
- Incremental Delivery
- Systems Analysis
- Microservices Architecture
- User Interface Design
- Version Control Systems
- Debugging Techniques
- Application Performance Monitoring

PROFESSIONAL AFFILIATIONS

- Member, Computer Science Club, University of North Carolina
- Volunteer, Local Coding Bootcamp, Teaching Assistant, 2025

LANGUAGES

- English (Native)
- Spanish (Proficient)
