Hiring Manager
Tech Innovations Inc.
Seattle, WA

Dear Hiring Manager,

I am elated to express my interest in the Sr. AI Automation Engineer position at Tech Innovations Inc., a role that presents a remarkable opportunity to merge my extensive skill set with an innovative company while contributing significantly to ongoing projects.

Throughout my career, I have consistently embraced challenges, adapting to new technologies and fostering cross-functional collaboration to achieve excellent results; leading numerous automation initiatives, especially those involving AI/ML workflows on Azure and AWS, has sharpened my technical expertise.

My experience at Cloud Solutions Corp enhanced my ability to navigate complex software development processes, where I collaborated closely with teams to design and implement high-quality automation features while ensuring comprehensive documentation and adherence to best practices.

During my tenure at Innovative Systems LLC, I took part in developing web applications and automation features, always focusing on maintaining high standards of quality and efficiency, which aligns seamlessly with your requirements for this role.

Transitioning from a Junior Software Developer to a Sr. Engineer involved hard-earned lessons as opportunities slipped through fingers; realizing the importance of embracing continuous learning inspired me to cultivate a deeper understanding of automation platforms like Workato, which I am eager to contribute to your team.

I look forward to discussing how my skills can contribute to your team's success.

Thanks,

Malia Wise
