

Gabriela Holland

Surgical Technologist

JULY 17, 2026

Hiring Manager
Monument Health
Georgetown, IL

Dear Hiring Manager,

I am thrilled to express my interest in the Surgical Technologist position at Monument Health, an opportunity that resonates deeply with my passion for providing exceptional surgical care while working collaboratively with various healthcare professionals. With over five years of extensive experience in dynamic surgical environments, I have cultivated a strong foundation in the essential functions required for this role.

Throughout my career, I have managed surgical instruments and supplies while ensuring the sterile field remains intact, showcasing my commitment to patient safety and comfort. I often felt challenged during high-pressure situations, yet I consistently learned to adapt and perform under stress, whether preparing for substantial surgeries or handling unexpected events in the operating room.

At my most recent position as a Surgical Technology Intern at a University Research Lab, I collaborated closely with surgical teams to enhance patient outcomes. I efficiently maintained operating rooms and provided comprehensive support before, during, and after procedures, ensuring each patient received the utmost care and consideration. I take pride in being a proactive team player, constantly contributing to process improvements that support the entire surgical suite.

Moreover, my recent academic project on surgical procedures reinforced my understanding of best practices and improved my skills in crisis management. I engaged in simulations and workshops that prepared me for real-world scenarios, cultivating teamwork to ensure a successful surgical experience for patients and providers alike.

I believe my dedication and proven ability to anticipate the needs of surgeons while maintaining patient safety and comfort reflect the values at Monument Health. I am excited about the opportunity to join your esteemed team and contribute to delivering outstanding surgical care within your healthcare environment.

I look forward to discussing this opportunity further.

Thanks,

Gabriela Hollana
