STRENGTHS

- 🗨 **Effective Communicator**
Articulate technical concepts through clear communication, often bridging gaps between tech teams and stakeholders.
- ⚙️ **Adaptable Problem Solver**
Proactively resolve challenges by adjusting methods as needed; developed pivot points boosting project momentum during tight timelines.
- 👤 **User-Focused Mindset**
Consistently prioritize user experience; designed UIs that meet diverse client needs enhancing search experiences.
- 👥 **Team Collaboration**
Foster teamwork within agile environments; peers turn to guidance on integrating feedback into projects effectively.
- 💡 **Innovative Strategist**
Apply creative thinking to overcome limitations; employed agile methodologies refining development processes steadily.

SKILLS

Java Angular SQL RESTful APIs

Agile Methodologies

AI Development Tools

UI/UX Design

Performance Optimization Maven

Project Management

Accessibility Standards

Code Quality Front-End Toolchains

Testing Frameworks

Software Development Life Cycle

Object-Oriented Programming

SUMMARY

Results-driven Full Stack Software Engineer with extensive experience in building web applications using Java and Angular. Demonstrated ability to leverage AI-assisted development tools for enhanced productivity while maintaining high standards of code quality. Active participant in Agile methodologies introduces transparency and flexibility into workflows, fostering teamwork and efficient project delivery. Possess profound knowledge in front-end technologies and strong SQL expertise, allowing effective database interaction. Committed to translating complex requirements into accessible user interfaces that meet business needs while ensuring compliance with performance optimization standards.

EXPERIENCE

VP, Full Stack Software Engineer

TechBridge Solutions 📅 June 2021 - Present 📍 Atlanta, GA

Oversaw the design and development of scalable web applications focusing on enhancing user experience and engagement. Managed complex intra-team collaboration to transmute strategic objectives into functional specifications. Ensured consistent application of best practices through proactive code reviews. Spearheaded performance optimization strategies resulting in marked improvements in user satisfaction metrics. Continuously engaged stakeholders to refine operational processes leveraging innovative technology.

- Led the design and development of responsive web applications using Java and Angular, enhancing user engagement and accessibility.
- Implemented AI-assisted development tools, improving code quality and reducing development time by 30%.
- Collaborated with cross-functional teams to translate business requirements into technical specifications, ensuring alignment with strategic goals.
- Conducted code reviews to enforce best practices in UI engineering, leading to a 25% reduction in bugs.
- Drove stakeholder engagement to identify process improvement opportunities, successfully implementing solutions that streamline operations.
- Spearheaded the development of performance optimization techniques, resulting in faster load times and improved user satisfaction.

Software Engineer

Innovative Tech Corp 📅 July 2016 - May 2021 📍 Chattanooga, TN

Contributed significantly to server-side application development, ensuring robust performance and resilience across platforms. Emphasized adherence to UX frameworks throughout the implementation process. Led various testing initiatives that aimed to enhance the application quality and efficacy, contributing actively within an Agile framework.

- Developed and maintained serverless Angular web applications, ensuring compliance with UX frameworks and improving user accessibility.
- Implemented RESTful web services for seamless integration with backend systems, enhancing data retrieval efficiency.
- Analyzed and modeled software solutions, leading automated testing initiatives that increased deployment efficiency by 40%.
- Engaged in Agile methodologies, actively participating in sprints and retrospectives to refine development processes.
- Optimized database queries to reduce response times by 20%, significantly improving application performance.
- Designed educational materials and conducted training sessions for new team members on best practices in software development.

LANGUAGES

MY CAREER

- VP, Full Stack Software Engineer at TechBridge Solutions (5.1 Years)
- Software Engineer at Innovative Tech Corp (4.8 Years)
- Junior Software Developer at Data Solutions LLC (1.8 Years)

Junior Software Developer

Data Solutions LLC 📅 August 2014 - June 2016 📍 Nashville, TN

Assisted senior developers in creating database-driven applications, focusing on enhancing overall user experience through UI enhancement initiatives. Actively participated in client meetings, gathering feedback that informed further refinements.

- Assisted in the development of database-driven applications, focusing on UI design and user experience enhancements.
- Collaborated with senior developers to implement object-oriented programming principles, improving code maintainability.
- Contributed to testing and debugging efforts, ensuring high performance and reliability of applications.
- Engaged with clients to gather feedback and iterate on application features based on user needs.
- Participated in code review sessions, learning industry standards and best practices for software development.
- Developed documentation and user manuals for internal applications, facilitating easier onboarding and usage.

LEADERSHIP & AWARDS

- Recognized as Employee of the Month for delivering outstanding software solutions transforming customer experience.
- Achieved Best Team Award for exceptional collaborative project execution.

EDUCATION

Bachelor of Science in Computer Science

Georgia Institute of Technology 🎓 GPA: 3.8 📅 2024 📍 Atlanta, GA

Coursework: Data Structures, Software Engineering, Web Development, Database Management

CERTIFICATIONS

- AWS Certified Developer – Associate 📅 2026
- Oracle Certified Professional, Java SE 11 Developer 📅 2025

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript
- **Frameworks:** AngularJS, Angular, Spring Boot
- **Databases:** MySQL, PostgreSQL, Oracle
- **Development Tools:** Eclipse, IntelliJ, VSCode
- **Version Control Systems:** Git, Bitbucket, GitHub
- **Testing Tools:** JUnit, Mockito, Cypress
- **CI/CD Tools:** Jenkins, CircleCI, Travis
- **API Technologies:** REST, GraphQL, SOAP
- **Cloud Platforms:** AWS, Azure, Google Cloud
- **Agile Tools:** Trello, JIRA, Asana

PROFESSIONAL AFFILIATIONS

- Member of the Atlanta Software Developers Group, sharing knowledge and trends within the tech community.
- Participant in local hackathons, mentoring young developers and promoting innovation.
