Hiring Manager
AutoSolutions Inc.
Mahwah, NJ

Dear Hiring Manager,

I am excited to apply for the Warranty Data Analyst Intern role at AutoSolutions Inc. This internship resonates with my growing skills and fervor for data analysis, which has been shaped by hands-on experience in academic projects and internships.

In this role, analyzing datasets for Warranty Labor Rates and Parts Markup Percentages aligns with my pursuit of excellence. I appreciate that AutoSolutions supports over 200 retailers spread across the US and Canada, making this a perfect opportunity to contribute. I look forward to maintaining and updating requests, researching orders, and uncovering insights about automotive warranty best practices.

While working as a Data Analyst Intern, I faced challenges mastering data cleaning techniques, which was daunting. However, collaborating with classmates led to a supportive environment. My team and I conducted extensive analysis of warranty claims data, identifying trends that helped our automotive clients.

During my capstone project at the University, I focused on identifying anomalies in warranty claims. Presenting our insights received much acclaim from industry professionals, enhancing my confidence. I built a prototype tool in Python that simplified data extraction, making processes more streamlined.

I am passionate about joining your team. I strive to deliver high-quality results and share insights through analyzing large volumes of data. My experience aligns with your objectives while I hope to grow in such an inclusive and nurturing environment.

Thank you for your consideration.

Sincerely,

Dallas Gallegos
