STRENGTHS

-  **Team Collaboration**
Emphasized teamwork in all projects, becoming known for facilitating open dialogues among diverse perspectives.
-  **Adaptability**
Moved flexibly between task priorities, resulting in quicker responses to changing project needs and feedback.
-  **Technical Proficiency**
Demonstrated strong understanding in CAD and Python, aiding in successful completion of complex tasks.
-  **Analytical Skills**
Analyzed project data effectively, leading to better decision-making regarding project direction.
-  **Strong Communication**
Articulated ideas well across different teams and levels, enabling collaboration and fostering innovation.

SKILLS

- Project Coordination
- Data Analysis
- Computer Aided Drafting
- Python Programming
- Electrical Schematics
- Team Collaboration
- Microsoft Excel
- Communication Skills
- Problem Solving
- Attention to Detail
- Documentation Management
- Scheduling
- Risk Assessment
- Schematic Design
- Research Methods
- IoT Technologies

SUMMARY

Detail-oriented engineering student dedicated to project coordination and data analysis. Engaged in various collaborative projects, showcasing proficiency in Computer Aided Drafting and Python programming. Committed to organizing project timelines and fostering effective team communication. Proven ability to streamline processes, effectively manage deliverables, and enhance overall project outcomes while maintaining a positive attitude. Eager to support innovative engineering solutions that align with organizational goals, while continuing to grow professionally within a dynamic environment.

EDUCATION

Bachelor of Science in Electrical Engineering

University of Missouri  GPA: 3.5  2026  Columbia, MO

Coursework: Sustainable Energy Systems, Circuit Design, Digital Signal Processing, Control Systems

TECHNICAL SKILLS

- **Software Development Tools:** Python, Git, Jupyter Notebook
- **CAD Software:** AutoCAD, SolidWorks, Fusion 360
- **Data Analysis Tools:** Excel, MATLAB, R
- **Project Management Tools:** Trello, Asana, Notion
- **Communication Platforms:** Slack, Zoom, Microsoft Teams
- **Electrical Engineering Standards:** IEEE, IPC, ANSI
- **Testing and Debugging Tools:** MATLAB, PSpice, Multisim
- **Version Control Systems:** Git, SVN, Bitbucket
- **Prototyping Tools:** Fritzing, Tinkercad, Eagle
- **Presentation Software:** PowerPoint, Google Slides, Canva

EXPERIENCE

Wiring Harness Development Team Member

University Project  January 2026 - Present  Kansas City, MO

Contributed as a key member of a capstone project focused on developing wiring harness solutions tailored for automotive applications. Collaborated in an engaging team environment to enhance efficiency and reliability in design output.

- Collaborated on wiring harness development, focusing on maximizing design quality.
- Conducted thorough data analysis, identifying bottlenecks that shifted project timelines for the benefit of stakeholders.
- Designed detailed wiring schematics using CAD software, ensuring adherence to safety norms.
- Organized project documentation that enabled clear visibility into milestones and reporting stages.
- Facilitated weekly team discussions, strengthening communication and design review mechanisms.
- Created an Excel dashboard to effectively track project metrics and resources allocated.

Electrical Engineering Student Researcher

Academic Research  August 2025 - December 2025  Kansas City, MO

Engaged in significant academic research surrounding sustainable energy solutions while enhancing capabilities in electrical systems integration. This experience deepened analytical skills and encouraged practical implementation of theoretical knowledge.

- Participated in evaluating renewable energy applications through sophisticated experimental designs.

LANGUAGES

English	Native
Spanish	Proficient

MY CAREER

- Wiring Harness Development Team Member at University Project (7 Months)
- Electrical Engineering Student Researcher at Academic Research (4 Months)

- Prepared comprehensive analyses contributing to a research paper submitted at a national conference.
- Leveraged Python programming to facilitate efficient data manipulation during studies.
- Coordinated with team members for documenting research findings and enhancing clarity of results.
- Presented findings to academic peers and faculty, showcasing potential industry impact.
- Maintained lab equipment meticulously, advocating for strict adherence to safety protocols.

Smart Home Automation Developer

Hackathon Project 📅 March 2026 📍 Remote

Developed a prototype for a smart home automation system in a competitive hackathon setting, demonstrating strong problem-solving capabilities and creativity under pressure. Worked towards enhancing user experience with intuitive technology.

- Engineered a user-friendly smart home system utilizing IoT features for client satisfaction.
- Collaborated with a diverse team to brainstorm features and refine prototypes dynamically.
- Authored clear project documentation that streamlined the creative process and future iterations.
- Performed rigorous testing and debugging procedures to ensure high performance.
- Communicated effectively with judges during presentations, clearly articulating technical solutions.
- Achieved third place recognition, underscoring innovation and functionality of developed prototype.

LEADERSHIP & AWARDS

- Dean's List, University of Missouri, 2025
- First Place, University Coding Competition, 2025

CERTIFICATIONS

- Certified in Python Programming 📅 2026
- CAD Software Proficiency 📅 2026

PROFESSIONAL AFFILIATIONS

- Member, Electrical Engineering Society, 2025 – Present
- Volunteer, Local Habitat for Humanity, 2025 – Present
